

Windows Print Driver Install

- I. In your browser (Google Chrome, Safari, Mozilla, etc.), go to steamboatcopiers.com
 - A. Choose "Support" on the left side of the screen.
 - B. Under "Support" scroll down and select "Print Driver Install Utility"
 - C. When the new screen opens select the "Device Software Manager" and then "Download"
 - D. Once the download is complete run the file and continue.
- II. Select "Yes" to allow the software to make changes to your computer.
 - A. The next Screen select "Accept Agreement and Install"
 - B. Once installed select "Next" on the next screen.
 - C. The following screen "End User License Agreement" select "Agree and Go to Next"
 - D. On the "Select a setup method" screen select "Network" and click "Next"
 - E. Now this should bring up "Select a device" this is where you can install the printer you are looking for. From the list in step "I" select the machine you wanted to install. Example below:

- F. Once you have selected your machine click next and this will finish the install of the printer.
- III. (Optional setting if using "User Codes")

After the printer has been installed you will need to add your user code to the print driver.

 - A. On your windows machine select the start icon and then start typing "Control Panel" you should see a search box with "Control Panel APP". Select this app and continue.
 - B. In the "Control Panel" you need to select "View devices and printers"
 - C. Find your printer and right click. Then select "Printing Preferences"
 - D. Under printing preferences select the "Detailed Settings Tab at the top. Then choose "Job Setup" and enter your copier user code. Now on the "Frequently Used Settings" tab select "2 sided:" to "Off" and change your "Color/Black and White" to "Black and White"
 - E. Then "Apply" to save your settings and select "OK" to exit.
